BUILDING PROJECT PHASE 2 GETS THE GREEN LIGHT

We were delighted recently to break the long-awaited news to our faithful church fellowship that we have now issued instructions to our builders to commence the second and final phase of our building project.

As with the first phase we have been blessed to maintain a steady accumulation of funds leading us to establish a starting point in mid-January 2020. Additional gifts were received this year from Charitable Trusts plus we have three long standing guaranteed amounts coming from trusts contacted earlier in the process.

So our plans are to celebrate the 2019 Christmas period in our current much loved but rather tired pre-fabricated building and then to be installed in our new church building for December 2020.

Exciting times lie ahead of us as we contemplate the next 12 months.
